Give your flat roof a makeover

Let there be light

Give flat roofs a makeover with Skypod – the ideal way to brighten up uninspiring interior

Skypod Lantern Roof
in Anthracite Grey
with White interior

A photograph of a bright, modern interior space. The ceiling features a large, multi-paned skylight with a white frame, through which a blue sky with white clouds is visible. Below the skylight, a wide, light-colored concrete or plaster ledge runs across the room. In the foreground, a large window with a white frame looks out onto a lush green landscape with trees and a garden. The room is filled with natural light, creating a bright and airy atmosphere. The text "Flood your home with natural light" is overlaid in the center of the image.

Flood your home
with natural light

Living spaces with wow factor

Imagine creating a stylish new living space that's flooded with natural light. Imagine an inspiring contemporary design feature that will not only enhance your lifestyle but add value to your home too. Some would call it the 'wow' factor. We call it Skypod – an innovative pitched lantern roof range that's been created for today's style-conscious homeowner.

Skypod Lantern Roof
in Anthracite Grey

Aspirational living spaces

Go large to create an impressive feature on your flat roof – maximising the natural light in your room

Skypod

In the past, lantern roofs were the preserve of high-end properties. These were not only expensive, but the slightly 'industrial' design wasn't to everyone's taste. That's why we created Skypod. As well as offering outstanding looks, it costs less – and provides the perfect match for your existing PVC-U windows and doors.

*no side rafter option for
unimpeded views*

◀ Skypod Lantern Roof
in White with no side rafter

▲ Skypod Lantern Roof
in White

Enjoy larger glass areas

With its clean lines and sleek looks, a Skypod lantern roof will add real height and volume to your room. And thanks to a no side rafter option, you can enjoy unimpeded views.

An energy efficient solution

Skypod can achieve exceptional U-values as low as 1.0* – this helps minimise heat loss, meaning that you can save money on your heating bills.

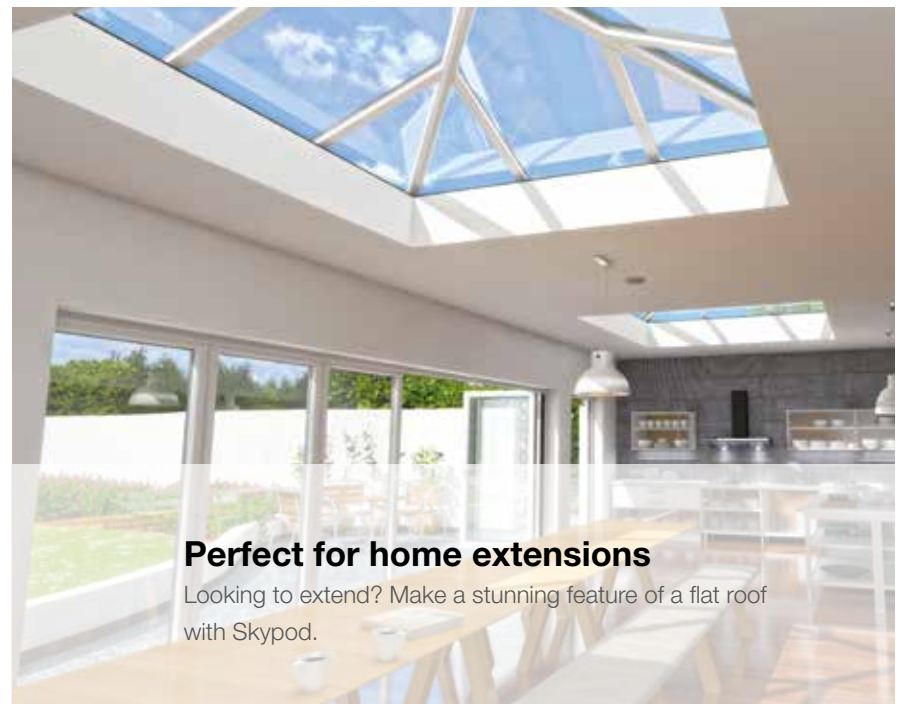

*Standard U Value is 1.2 – U-value is applicable to glass only.

A perfect square

Whatever the size, Skypod squares up

Whether you're looking for a small rooflight or large gazebo-style lantern roof, there's a solution for you. Our new dedicated frame system means that rafter bars line-up perfectly, whatever the size.

SKYPOD

Perfect for home extensions

Looking to extend? Make a stunning feature of a flat roof with Skypod.

A new angle on the lantern roof

Skypod lantern roofs are great if you've got a flat roof big enough to take a full lantern. But what about the homes with smaller extensions and outhouses crying out for a little natural light? Well that's where you need our Skypod with a 35° pitch instead of the usual 20°. That means it can be made in much smaller sizes (right down to 0.5 × 0.5m) and fitted to a much smaller roof while maximising the amount of natural light into your home.

SKYPOD

Aspirational living spaces

Create an impressive feature on smaller flat roofs and maximise natural light in your home.

Skypod Plus

The easy way to add more class to your glass roof

Introducing the Skypod Plus. Designed with a premium frame that looks great, is high quality and easy to install. Skypod Plus is available in black, white and grey.

Like the rest of the Skypod range, this sleek, modern lantern roof has been designed to meet the demands of design-conscious buyers.

Style-savvy people who want to let more natural light into their flat roof extension or garage conversion, but also demand contemporary design that works in harmony with their living space.

Premium finish

Because we've used an aluminium frame and aluminium ridge and top rafter cappings, Skypod Plus offers a premium quality finish, for years of faithful service.

Multiple design options

Eurocell Skypod Plus is available in a range of stylish options, helping you make light work of the most demanding design and installation requirements
