LANTERN ROOFS

aspirational living spaces

Go large to create an impressive feature on your flat roof – maximising the natural light in your room

Make your home a star

Imagine creating a stylish new living space that's flooded with natural light. Imagine an inspiring contemporary design feature that will not only enhance your lifestyle but add value to your home too. Some would call it the 'wow' factor. We call it Skypod – an innovative pitched lantern roof range that's been created for today's style-conscious homeowner.

The Eurocell Skypod pitched lantern roof system enables you to create an eye-catching, contemporary feature that floods the interior of a property with natural light. It brings life and freshness to uninspiring flat-roofed buildings, and makes a stunning alternative to conventional conservatory roofs.

Skypod lantern roofs add height, light and volume to any living space. They are the perfect choice for a wide range of refurbishment, extension or new-build projects – including reception areas, classrooms, orangeries, kitchen-diners and garage conversion

skypod
LANTERN ROOFS

Styles to suit

every home

Skypod is available in a wide range of sizes and styles, so you can create a lantern roof that complements the individuality of your home. Skypod is suitable for a wide range of projects such as flat-roofed extensions, orangeries, new builds, kitchen-diners and garage conversions. Go large to create an impressive feature on your flat roof – maximising the natural light in your room.

Up to 1.5m x 2.75m

Up to 2.75m x 8.7m

A perfect

square

The alternative to a single span rectangular rooflight, our square lantern roof offers perfectly balanced sightlines and, thanks to its simple 4-hip design, higher levels of natural light than conventional designs of the same surface area. Because it can be produced in sizes right down to 0.5m× 0.5m, this means that even the smallest flat roofs can still benefit from day long natural light.

Skypod Lantern Roof
square shaped in Anthracite Grey

Whatever the size, Skypod squares up

Whether you're looking for a small rooflight or large gazebo-style lantern roof, there's a solution for you. Our dedicated frame system means that rafter bars line-up perfectly, whatever the size.

Perfect for home extensions

Looking to extend? Make a stunning feature of a flat roof with Skypod.

Looking to expand?

skypod plus

The easy way to add more

class to your glass roof

Skypod Plus has been designed with a premium frame that looks great, is high quality and easy to install.

Available in black, white and grey This sleek, modern lantern roof has been designed to meet the demands of design-conscious buyers.

If you want to let more natural light into your flat roof extension or garage conversion, but also want a contemporary design that works in harmony with your living space, then Skypod Plus is the perfect solution.

premium finish

Premium finish

Because we've used an aluminium frame and aluminium ridge and top rafter cappings, Skypod Plus offers a premium quality finish, for years of faithful service.

Multiple design options

Eurocell Skypod Plus is available in a range of stylish options, helping you make light work of the most demanding design and installation requirements

INSTALLATION

Skypod has been designed for fast, accurate, simple installation. Everything is pre-cut and all screw holes are pre-drilled.

This ensures installers can provide a precision-fitted watertight lantern roof, while making the job as quick and easy as possible. What's more, the architectural design means there are no fussy ridge crestings or finials to fit, giving you the ultimate in clean sight-lines. A unique ridge end cover cap completes the sleek appearance.

luma
FLAT ROOFLIGHTS

Luma flat rooflights are elevated, fixed shut, flat roof windows with a sleek and contemporary look.

And, unlike roof lanterns, there are no bars across the glass to interrupt your view of the sky or cast shadows across your room.

They're the perfect way to flood your home with natural light. So, whether you're planning a new flat roof extension or want to breathe life into an existing one, adding Luma flat rooflights will totally transform the space.

At Eurocell, we believe you should never have to compromise on quality or performance when you make improvements to your home. That's why innovation is at the heart of our Luma flat rooflights. We've built-in exclusive, market-leading features that come as standard to bring you a premium-quality product that performs excellently.

flat roof option

Thermally broken and glazing options

for excellent energy efficiency

Luma's aluminium frame has an integrated thermal break, which reduces heat transfer. And it's available in double-glazed and triple-glazed options, with U-values of 1.3 W/m²K for double and 0.92 W/m²K for triple-glazed. So, you'll stay cool in summer and warm in winter and save money on energy bills.

Tinted laminated glass options

Luma is available with either neutral, clear or blue tinted glass. Tinted glass still allows the light to flood in but reduces uncomfortable glare when the sun hits the glass.

Secured from the inside

Interior fixings allow Luma to be secured internally for an added layer of security.

Slimline modern profile with sleek seamless glazing Exclusive to Luma

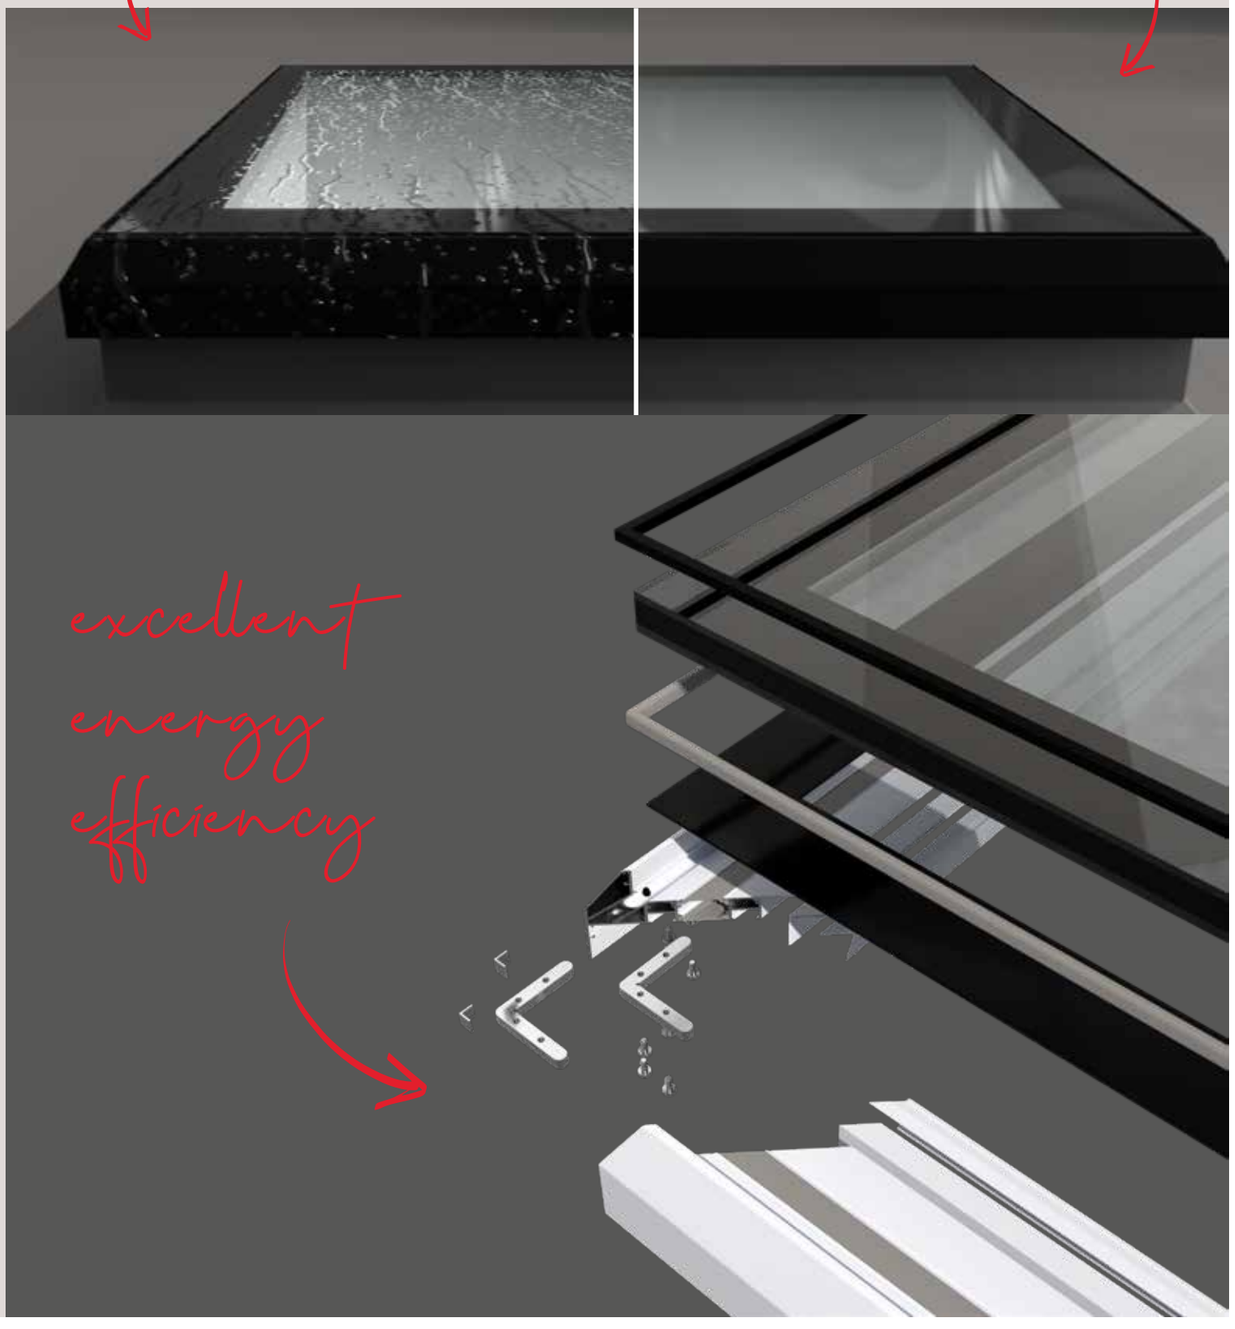
Luma's sleek aluminium frame and unique glazing tape mean there are no chunky frames or painted borders. And there are no bars across the glass to impede your view either. The inside is beautifully finished with a PVC plasterboard trim. The result is minimal framework and maximum daylight.

Integral drainage system

The outer frame includes a unique drainage system that allows moisture to drain away outside for added reassurance.

High performance self-cleaning glass

Luma features self-cleaning glass. It has a special coating that uses UV rays to break down organic matter on the surface, which then washes away when it rains. So, the glass stays cleaner for longer, and the need for regular washing is significantly reduced.



COLOUR YOUR WORLD

Available in

square and rectangular designs

Luma flat rooflights are made to measure, allowing you to create a rooflight that perfectly fits your space and style. Square designs range from 500 x 500mm to 1400 x 1400mm, and rectangular designs from 500mm wide up to 3000mm projection.[1]

Add just one rooflight, or consider adding two or more for a large extension. Luma flat rooflights are suitable for many projects, such as existing or new flat roof extensions, garage conversions, new builds and even garden rooms.

Frame colours

MATT BLACK RAL9005

WHITE RAL9003

ANTHRACITE GREY RAL7016

ANY RAL COLOUR Sprayed[2]

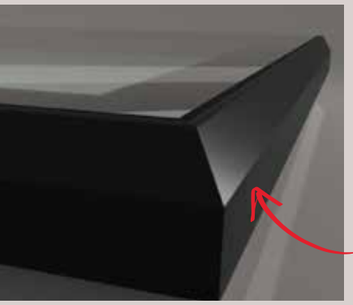
Glass options

BLUE

NEUTRAL

CLEAR

As an upgade to the glass you can have ceramic boarder adding, this really gives a premium finish as it conceals the frame inside and gives a crisp black board around the Luma.



Weather-resistant powder-coated frame
Luma is built to withstand everything the British weather can throw at it. Its aluminium frame is powder coated to Qualicoat Seaside standards for durability and has a UV-resistant, weather-tight seal. It also comes in a choice of finishes to complement your home. Opt for a standard Matt Black, White or Anthracite Grey frame or choose from a range of painted colour options.[2]

1. Subject to maximum glass area of: Double (with ceramic) 2.5m sq. Triple (with ceramic) 2.5m sq. Double (without ceramic) 3.5m sq. Triple (without ceramic) 2.85m sq. May also be subject to Eurocell's handling restrictions.
2. Extended lead times apply.
3. Installation at 5° pitch is recommended.

Future Homes Ready
Building Regulations are changing. In 2025 a new Future Homes Standard will be introduced, which requires all new homes to be future-proofed with low-carbon heating and world-leading levels of energy efficiency. So, we've designed Luma flat rooflights to be Building Regulations compliant. Not just for now but for the future too.

Are you an

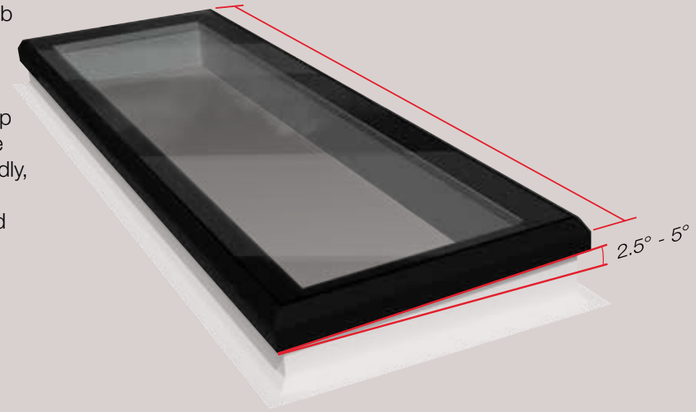
installer?

Easy to install and delivered straight to site
Luma flat rooflights are made to order in our factory, then delivered straight to site. They're easy to install, helping you complete the job quickly, with no fuss and no mess.

Our service promise to you
We know how important it is to you to keep your customers happy. That's why we take great pride in consistently providing a friendly, approachable service to make finding and getting what you and your customers need quick and easy.

Made-to-measure
Can be sized from 500 x 500mm up to 1400 x 3000mm.[1] Ask us for a quote.

2-5° installation pitch
Flexible installation options to minimise pooling of water.[3]



Here's how we help:

Quotes in under 1 hour
There's no waiting around. Just call, drop us an email or fill in the contact form on our website to request a quote, and we'll respond within an hour.[4]

Lead times to suit you
Tell us when you need the products to be on site, and we'll ensure they're there at the right time.

Order checking
Our orders are thoroughly checked prior to delivery, allowing you to get on with installing Luma right away.

Technical support line
Luma flat rooflights are easy to install, but if you need help, our expert technical team are just a phone call away.

3. Installation at 5° pitch is recommended
4. Applies within normal office working hours: Mon-Fri 8.30 - 17.00

Our high quality

standards

Eurocell plc is the UK's leading manufacturer, distributor and recycler of PVC window, door, conservatory and roofline systems, offering the widest product range of any single brand.

- All Eurocell products are manufactured to stringent specifications in a carefully controlled environment where high standards can be maintained and guaranteed. To give customers the assurance that all Eurocell products meet the highest standards, we have achieved accreditations from leading UK certification bodies.
- Eurocell products meet the requirements of current Building Regulations, and exceed the standards set out in Part L1 and 2 Conservation of Fuel & Power (Windows).
- As new regulations are introduced, Eurocell remains committed to meeting and exceeding these ever more demanding standards, so that we continue to set the quality benchmark for the building plastics industry.
